

Reformation fiber standards

Goal of 75% of all Ref Production		Not Preferable for Ref Production		Eww, never use
A All stars	B Better than most	C Could be better	D Don't use unless certified	E Eww, never use (unless 10% of content)
Recycled cotton *Global Recycled Standard (GRS) certification required	Organic cotton/ transitional cotton *GOTS certification required for < 70% *OCS certification required for >70% *Proof of transitional cotton required	Alpaca *Traceability in order to ensure animal-friendly practices *GOTS certification preferred	Silk *Bluesign® certification required for solid dyed and preferred for prints *Oeko-Tex® certification and digital print process required for facilities that are not Bluesign® certified.	Conventional silk
Tencel™ Lyocell *Lenzing verification letter required	*Uzbek, Turkmenistan or Syria cotton prohibited *Supply chain mapping to farm level *Ability to develop a relationship with the farm as needed to ensure fair and safe working conditions are met.	Yak wool *Traceability in order to ensure animal-friendly practices	Responsible wool *Responsible Wool Standard (RWS) certification required *Must be in a blend with recycled content fiber *Must be non-mulesed sheep wool	Conventional cotton
TENCEL™ x REFIRBA™ Lyocell *Lenzing verification letter required	Fair trade cotton *Fair trade certification required	Organic wool *GOTS certification required *Must be non-mulesed sheep wool	FSC certified viscose	Conventional wool & cashmere
Organic linen *Global Organic Textile Standard (GOTS) certification required	Canopy green shirt viscose Must be FSC certified *Green shirt ranking in Canopy hot button report	Canopy engaged viscose *Must be FSC certified *Producer has signed Canopy policy and is working towards improvements	Leather *Leather (cow, goat, pig) *Ensures the Five Freedoms of Animal Welfare and protects land, particularly from deforestation *Vegetable tanned or chrome-free tanned *Leather Working Group (LWG) certified (rated Gold or Silver w/ traceability score) *Or have other third-party verification meeting equivalent ecological criteria *Certified by-product *Leather and skins must be sourced from by-products of the meat industry. Animals may not be raised exclusively for their skins. Chain of custody documentation to farm level preferred.	Conventional acrylic
Organic hemp *GOTS certification required	Conventional linen	Chemically recycled nylon ** *Outerwear, accessories, swim, bridal	Recycled wool *Cardato Regenerated CO2 Neutral Products certification or GRS certification required	Recycled acrylic *TBJ and dresses
Regenerative Organic Certified™ Cotton *ROC certification required	Conventional hemp	Chemically recycled polyester ^1** *Outerwear, accessories, bridal	Recycled cashmere *GRS certification required	Conventional viscose
Jute	Tencel™ Modal *Lenzing verification letter required	PU leather *** *Poly/nylon/polyamide blend . *Recycled content blends preferred *Plant based polyester preferred Polyurethane Laminate (PUL) *Must use water based solvents	Recycled acrylic *Outerwear, accessories, swim, bridal *GRS certification required	Conventional nylon
Ramie	Mechanically recycled nylon *Outerwear, accessories, swim, bridal *GRS certification required	Mechanically recycled polyester ^1 *Outerwear, accessories, swim, bridal *GRS certification required	Spandex *****If Spandex is needed for construction, the percentage can go >15%	Recycled nylon *TBJ and dresses
Deadstock materials *Deadstock verification required	Mechanically recycled polyester ^1 *Outerwear, accessories, swim, bridal *GRS certification required		PVC	Conventional polyester
Post-consumer recycled leather *GRS certification required			Fur	Recycled polyester (rpet) *TBJ and dresses
			Angora & mohair	

For all recycled and organic certifications, we require scope certificates from each facility prior to PO being placed. Transaction certificates must be issued after PO is placed for full supply chain.

Still reviewing Camel hair, Cupro, Crailer, Organica wool, Climate beneficial wool, Soybean protein fiber

** If closed loop chemically recycled nylon & polyester then it is considered "Better Than Most"

*** PU Leather has a significantly lower environmental impact than conventional leather. Must test for durability with testing partner

****If Spandex is needed for construction, the percentage can go up to 15%

*****Specific application is based on washing frequency in relation to garment type.

^1 Feedstock can be: rPET or polyester garments.
